

Agrocéan CaCl

EU FERTILIZER WITH CHLORIDE OF CALCIUM

Densité : 1,30

♦ **COMPOSITION:** Concentrate of Laminaire

✓ Calcium Chloride (CaO) soluble in water 15,00 % (195,00 g/l)

♦ **INSTRUCTIONS FOR USE – COMPATIBILITY**

Agrocéan CaCl, is applied as a foliar spray diluted in water to give satisfactory coverage, usually between 0,3 and 2 %.

Agrocéan CaCl, can be mixed at the time of spraying with various phytosanitary agents to improve their effectiveness*. Poor at least **Agrocéan CaCl** in the sprayer.

** This supplier is not liable for the results of these indications. For any other mixture, run a test spraying or consult Agrocéan.*

♦ **INTERESTS**

Agrocéan CaCl, based on the concentrate of LAMINAIRE (deep seaweed), increases the final quality of the fruit, improves the nutrition in calcium, fights against the bitter-pit and limits the diseases of preservation.

♦ **DOSAGE AND STAGE OF APPLICATION**

Apple - Pear: 8 to 10 l/ha per treatment at the I-J stage, then every 12 days (5 applications)

Peach - Apricot: 5 to 8 l/ha 3 weeks before harvest time, then every week (3 applications)

Cherry - Plum: 5 to 8 l/ha 1 month before harvest time, then every week (3 applications)
